COMUNICADO nº 004/2012 – ÁREA DE CIÊNCIA DA COMPUTAÇÃO ATUALIZAÇÃO DA CLASSIFICAÇÃO DE CONFERÊNCIAS DA ÁREA

Brasília, 31 de Agosto de 2012

Este comunicado visa descrever e informares os pontos e sistemática que nortearam o trabalho do Comitê da Área de Ciência da Computação na atualização da Classificação de Conferências de 2011.

Inicialmente é importante ressaltar a particularidade da área da Ciência da Computação. A comunidade da área, já de longa data (como bem descrito no documento de área em 2009), segue o mesmo paradigma adotado pelos países de maior liderança científica na Ciência da Computação. Ou seja, no exterior e no Brasil é bem definido que trabalhos publicados conferências da área são equivalentes àqueles em revistas científicas. A quase totalidade são séries de conferências periódicas e regulares, com comitês internacionais de programas e publicação que estabelecem um rigoroso processo de avaliação por pares, bastante similar ao que ocorre nas revistas. Como descrito abaixo, existem indicadores estabelecidos pela comunidade que são os equivalentes do fator de impacto, índice-h-H, etc., para os trabalhos em periódicos. Assim, todas as conferências que não adotam tal procedimento não são consideradas na área, em particular as realizadas no país, mas que, de fato, são eventos esporádicos ou únicos, de abrangência muito limitada e sem rigor de alta qualidade.

Para classificar as conferências relevantes da área de Ciência da Computação, foi adotado o mesmo princípio do triênio anterior (2007-2009). A fonte é o Google Scholar, por ser a mais completa no que diz respeito a dados de citações para conferências da área de Ciência da Computação. Assim, a Comissão de Avaliação da Área de Ciência da Computação da Capes utiliza essa fonte para computar o Índice-H de cada conferência.

Para automatizar o processo de cálculo do Índice-H de cada conferência, a Sociedade Brasileira de Computação (SBC) desenvolveu a iniciativa Perfil-CC SBC com os objetivos de: (1) levantar um conjunto de conferências de interesse para a Comunidade Brasileira de Computação; e (2) disponibilizar um mecanismo verificável de medição de impacto dessas conferências. Para tanto, a SBC, por intermédio de suas Comissões Especiais, apoiou a construção de uma lista-base de conferências. Com o conhecimento de suas Comissões Especiais, a SBC revisou a lista de Conferências da classificação em 2009 e desenvolveu um arcabouço de software para o cálculo do Índice-H a partir do número de citações de cada artigo dessas conferências, sendo este número obtido do Google Scholar. As listas de artigos das conferências foram obtidas de fontes reconhecidas pela área de Ciência da Computação,

Ministério da Educação

Coordenação de Aperfeiçoamento de Pessoal de Nível Superior

Diretoria de Avaliação

02.comp@capes.gov.br

tais como DBLP, ACM-DL, IEEE Xplore, BDBComp, JEMS, etc. É importante notar que a iniciativa Perfil-CC SBC não indicou níveis de classificação para as conferências, pois essa indicação não é competência desta.

Os resultados desse trabalho estão disponíveis de forma *on-line* por meio da ferramenta SHINE — Simple H-index Estimation (http://shine.icomp.ufam.edu.br/). Esses resultados foram adotados como base para a classificação realizada pela Comissão de Avaliação do Qualis da Área de Ciência da Computação da Capes em 2012. Ressalva-se que foram excluídas da Classificação de Conferências algumas conferências cujos artigos são publicados integralmente em periódicos já classificados no sistema Qualis de Periódicos — o WebQualis (ex., VLDB, SBBD e SIGGRAPH, entre outros).

Com base nos Índices-H das conferências, os limiares de cada estrato (A1, A2, etc.) foram estabelecidos a partir dos limiares usados na classificação dos periódicos, tendo como objetivo equiparar os dois tipos de veículo, respeitando-se assim os princípios estabelecidos pela Área. Tal procedimento resultou na seguinte distribuição por estratos:

Estrato	A1	A2	B1	B2	В3	B4	B5
%	6,95	8,25	17,79	12,31	14,90	28,15	11,66

Considerando a Classificação de Conferências do Triênio 2007-2009, há cerca de 21% de conferências cujo estrato atual é inferior ao do triênio anterior, 52% cujo estrato atual é superior e 27% que se mantiveram no mesmo estrato. É importante mencionar que nenhuma conferência teve a sua classificação reduzida em mais de um estrato, seguindo determinação da Coordenação da Área.

WRVA	Workshop de Realidade Virtual e Aumentada	2	B5
WS-REST	International Workshop on RESTful Design	6	B4
WSC	Winter Simulation Conference	56	A1
WSCAD-SSC	Simpósio em Sistemas Computacionais	4	B4
WSCG	International Conferences in Central Europe on Computer Graphics, Visualization and Computer Vision	30	B1
WSDM	International Conference on Web Search and Data Mining	35	B1
WSE	IEEE International Symposium on Web Systems Evolution	20	B2
WSKS	World Summit on the Knowledge Society	10	B4
WSNA	ACM International Conference on Wireless Sensor Networks and Application	29	B1
WSOM	Workshop on Self-Organizing Maps	9	B4
WSPI	International Workshop on Philosophy and Informatics	5	B4
WSWED	Brazilian Workshop on Semantic Web and Education	1	B5
WTF	Workshop de Testes e Tolerância a Falhas	4	B4
WTI	International Workshop on Web and Text Intelligence	3	B5
WTS	Wireless Telecommunications Symposium	14	В3
WUWNET	International Conference on Underwater Networks	16	B2
WVC	Workshop de Visão computacional	3	B5
WWIC	Wired/Wireless Internet Communications	15	В3
WWW	International World Wide Web Conference	145	A1
X-Meeting	International Conference of the Brazilian Association for Bioinformatics and Computational Biology	8	B4
XP	International Conference on Agile Processes in Software Engineering and eXtreme Programming	20	B2
XSym	International XML Database Symposium	15	В3
